

Simonis 860™

The Standard for Pool

Simonis Cloth – Manufactured in Verviers, Belgium Since 1680

Durability

Optimal thread count, high wool content and proprietary methods of production ensure that Simonis cloth provides outstanding accuracy and consistency which is why Simonis has remained the reference cloth for generations.

Performance

Simonis offered the first worsted cloth for billiards. Worsted construction means that there are no short fibers that can release (shed) from the cloth to form "pills" or fuzz-balls that have to be removed from the playfield in order to allow the ball to roll straight. With Simonis, ball spin is consistent, and the roll stays straight and true on every shot.

Character

Simonis cloth enhances your enjoyment by allowing you to play your best. Simonis is the truest playing cloth. This means that it will provide the best play possible on any table. Remember, the balls do not roll on the slate, they roll on the cloth so make sure you have Simonis.

Precision

Iwan Simonis meets the stringent standards of ISO 9001:2000 certification for the production and sale of billiard cloths. In addition, Simonis conducts regular dynamometric tests to maintain the tolerances of extension and elasticity of our cloth. These tests ensure the consistent quality of Iwan Simonis cloths, a fact you can witness on your table.

History

Simonis has been manufacturing cloth with a tradition of craftsmanship that our mill in Verviers, Belgium, pioneered and has refined for over three centuries. The result is a beautiful precision cloth that achieves the smoothest, most accurate and most consistent play surface available.

Superior Value

Simonis plays better, longer all the while allowing you to play your best.

An investment in Simonis is an investment in your enjoyment.
